

# INSPECTION

B80407

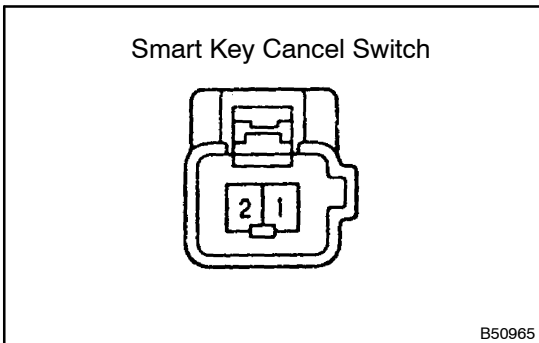

## 1. INSPECT OUTSIDE DOOR HANDLE

- Remove the outside door handle.
- Check the resistance between the terminals of the connector when the switch is operated.

### Standard:

Switch Condition	Tester Connection	Specified Condition
Switch pushed	4 - 5	Below 1 $\Omega$
Switch not pushed	4 - 5	10 k $\Omega$ or higher

If the result is not as specified, replace the outside door handle.

Smart Key Cancel Switch

B50965

## 2. INSPECT SMART KEY CANCEL SWITCH

- Remove the smart key cancel switch.
- Check the resistance between the terminals of the connector when the switch is operated.

### Standard:

Switch Condition	Tester Connection	Specified Condition
Switch pushed	1 - 2	Below 1 $\Omega$
Switch not pushed	1 - 2	10 k $\Omega$ or higher

If the result is not as specified, replace the smart key cancel switch.
