

TERMINALS OF ECU

| Symbols (Terminal No.)     | Wiring Color         | Condition                                 | Specified Value  |
|----------------------------|----------------------|---|------------------|
| SOL+ (P52-1) - GND (P52-6) | G - W-B              | Vehicle speed 0 km/h → 35 km/h            | 6 → 4.4 V        |
| SOL- (P52-2) - GND (P52-6) | L-B - W-B            | IG switch ON                              | Below 1 V        |
| IG (P52-4) - GND (P52-6)   | B-R - W-B            | IG switch ON                              | 10 to 14 V       |
| SPD (P52-5) - GND (P52-6)  | V-W - W-B            | IG switch ON, rotate driving wheel slowly | Pulse generation |
| GND (P52-6) - Body ground  | W-B -<br>Body ground | Always                                    | Below 1 Ω        |
