DTC	B2234	FRONT RIGHT CENTER SENSOR MALFUNCTION	
-----	-------	---------------------------------------	--

CIRCUIT DESCRIPTION

Ultrasonic sensor consists of a sensor portion that transmits and receives ultrasonic waves and a pre–amplifier that amplifies them. The ultrasonic sensor outputs the ultrasonic transmission and reception signals to the clearance warning ECU assy.

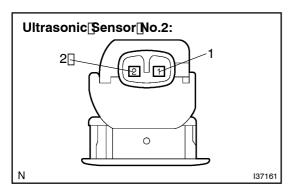

DTC No.	DTC detecting condition	Trouble area
		Ultrasonic sensor No.2
B2234	Malfunction of ultrasonic sensor (Front right center)	Wire harness
		Clearance warning ECU assy

WIRING DIAGRAM

INSPECTION PROCEDURE

1 | INSPECT[ULTRASONIC[SENSOR[NO.2

- (a) Remove ultrasonic sensor No.2.
- (b) Measure[the[resistance[according[to[the[value(s)]]n[the table[below.

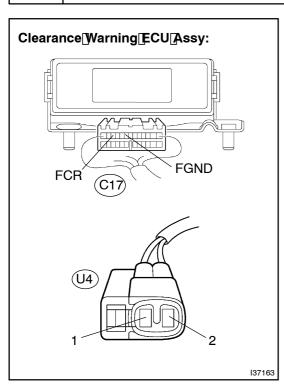

Tester@connection	Condition	Specified@ondition
1 -[2	Always	10 ± [2 kΩ

REPLACE[ULTRASONIC[\$ENSOR[NO.2 (SEE[PAGE[67-27)]

OK

2 | CHECK[HARNESS[AND[CONNECTOR(CLEARANCE[WARNING[ECU[ASSY - ULTRASONIC[\$ENSOR[NO.[2])

- (a) Disconnect the C17 connector from the clearance warning ECU assy.
- (b) Disconnect de de de la Disconnect de de la Disconnect de la Disconnect
- (c) Measure the resistance according to the value (s) in the table below.

Tester[tonnection (Symbols)	Condition	Specified[]value
C17-11[[FCR] -[]U4-2	Always	Below[] [Ω
C17-8[[FGND] -[]U4-1	Always	Below[] [Ω
C17–11[[FCR) – Body[ground	Always	10[k̪ᡌᢩᠪr[իigher
C17–8[[FGND) – Body[ground	Always	10[kքի[þigher

NG

REPAIR OR REPLACE HARNESS OR CONNECTOR

OK

REPLACE[CLEARANCE[WARNING[ECU[ASSY[SEE[PAGE[67-30]
