PROBLEM SYMPTOMS TABLE

Symptom Suspected Area See∏Page 1. Rear seat control switch power source circuit 05-2411 All functions of rear power seat system do not operate. If the suspected area above is functioning normally, replace the (Both left and right) rear seat control switch. 05-2354 1. Rear LH seat ECU power source circuit 2. Rear seat control switch power source circuit 05-2411 Rear left side power seat system does not operate. 05-2413 3. Rear seat control switch circuit If the 3 suspected areas above is functioning normally, replace the rear LH seat ECU. 05-2356 1. Rear RH seat ECU power source circuit 2. Rear seat control switch power source circuit 05-2411 05-2413 Rear right side power seat system does not operate. 3. Rear seat control switch circuit If the 3 suspected areas above is functioning normally, replace the rear RH seat ECU. 05-2413 1. Rear seat control switch circuit 2. Slide power seat motor circuit (LH) 05-2367 Slide operation does not operate. 3. Slide position sensor circuit (LH) 05-2389 (Rear left side) If the 3 suspected areas above is functioning normally, replace the rear LH seat ECU. 05-2413 1. Rear seat control switch circuit 05-2370 2. Slide power seat motor circuit (RH) Slide operation does not operate. 3. Slide position sensor circuit (RH) 05-2393 (Rear right side) If the 3 suspected areas above is functioning normally, replace the rear RH seat ECU. 05-2413 1. Rear seat control switch circuit 05-2373 2. Headrest motor circuit (LH) Headrest operation does not operate. 3. Headrest limit switch circuit (LH) 05-2383 (Rear left side) 05-2373 4. Headrest position sensor circuit (LH) If the 4 suspected areas above is functioning normally, replace the rear LH seat ECU. 05-2413 1. Rear seat control switch circuit 05-2378 2. Headrest motor circuit (RH) 05-2386 3. Headrest limit switch circuit (RH) Headrest operation does not operate. 05-2378 (Rear right side) 4. Headrest position sensor circuit (RH) If the 4 suspected areas above is functioning normally, replace the rear RH seat ECU. 1. Rear door LH ECU power source circuit 05-2361 05-2418 2. Rear seat memory switch circuit (LH) 3. Slide position sensor circuit (LH) 05-2389 Rear left side seat position memory function does not operate. 05-2373 4. Headrest position sensor circuit (LH) If the 4 suspected areas above is functioning normally, replace the rear LH seat ECU. 05-2364 1. Rear door RH ECU power source circuit 2. Rear seat memory switch circuit (RH) 05-2421 05-2393 3. Slide position sensor circuit (RH) Rear right side seat position memory function does not operate. 4. Headrest position sensor circuit (RH) 05-2378 If the 4 suspected areas above is functioning normally, replace the rear RH seat ECU. 1. Passenger side J/B ECU power source circuit 05-2358 2. Rear seat return switch circuit 05 - 2415Rear seat position return function does not operate. If the 2 suspected areas above is functioning normally, replace the rear LH seat ECU that is malfunctioning. 05-2361 1. Rear door LH ECU power source circuit 2. Door courtesy switch circuit (LH) 05-2424 Rear left side door open linked return function does not operate. If the 2 suspected areas above is functioning normally, replace the rear LH seat ECU.

DIAGNOSTICS - REAR POWER SEAT CONTROL SYSTEM

Rear right side door open linked return function does not operate.	Rear door RH ECU power source circuit Door courtesy switch circuit (RH) If the 2 suspected areas above is functioning normally, replace the rear RH seat ECU.	05–2364 05–2427
Rear left side vibration seat function does not operate.	Vibration seat function does not operate (Rear seat ECU operation check) Vibration seat ECU communication circuit (LHD models LH) Vibration seat ECU communication circuit (RHD models LH) Vibration circuit (LH) If the 3 suspected areas above is functioning normally, replace the vibration ECU LH.	05–2430 05–2403 05–2407 05–2397
Rear right side vibration seat function does not operate.	 Vibration seat function does not operate (Rear seat ECU operation check) Vibration seat ECU communication circuit (LHD models RH) Vibration seat ECU communication circuit (RHD models RH) Vibration circuit (RH) If the 3 suspected areas above is functioning normally, replace the vibration ECU RH. 	05-2405 05-2409 05-2400
