DI8BA-01

DTC P1128/89* Throttle Control Motor Lock Malfunction

CIRCUIT DESCRIPTION

Throttle motor sperated by the engine ECU and topens and closes the throttle valve.

The pening angle of the throttle valve is detected by the throttle position sensor which is mounted on the throttle pody and to provide the throttle pody and to provide the throttle pody and the thr

If this DTC is stored, the engine ECU shuts down the power for the throttle motor and the magnetic clutch, and the throttle valve is fully closed by the feturn spring.

 $However, \center{like pening angle for the controlled by the accelerator \center{like throttle for the controlled by the accelerator \center{like throttle for the controlled by the like throttle for throttle for the like throttle for the like$

INSPECTION PROCEDURE

HINT:

Read[freeze[frame[data[using[hand-held[tester.[Because[freeze[frame[]ecords[fhe]engine[conditions]when the frame[]ecords[frame[]ecords[freeze[frame[]ecords[freeze[frame[]ecords[freeze[frame]]ecords[frame]]ecords[freeze[frame]]ecords[frame]]ecords[frame]]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]ecords[frame]ecords[frame]]ecords[frame]ecords[frame]ecords[frame]ecords[frame]ecords[frame]]ecords[frame]ecords

1 Check[throttle[control[motor[See[page[FI-34]].

NG

Replace[hrottle[control[motor[See[page FI-36]]]]

OK

^{*:[}ETCS[trouble[code[No.[is[31.

2 Visualy check throttle valve.

PREPARATION:

Remove the intake air duct.

CHECK:

Check whether or not a foreign body is caught between the throttle valve and the housing.

NG

Remove a foreign body and clean throttle body.

OK

Replace throttle body.
